HEADSTART
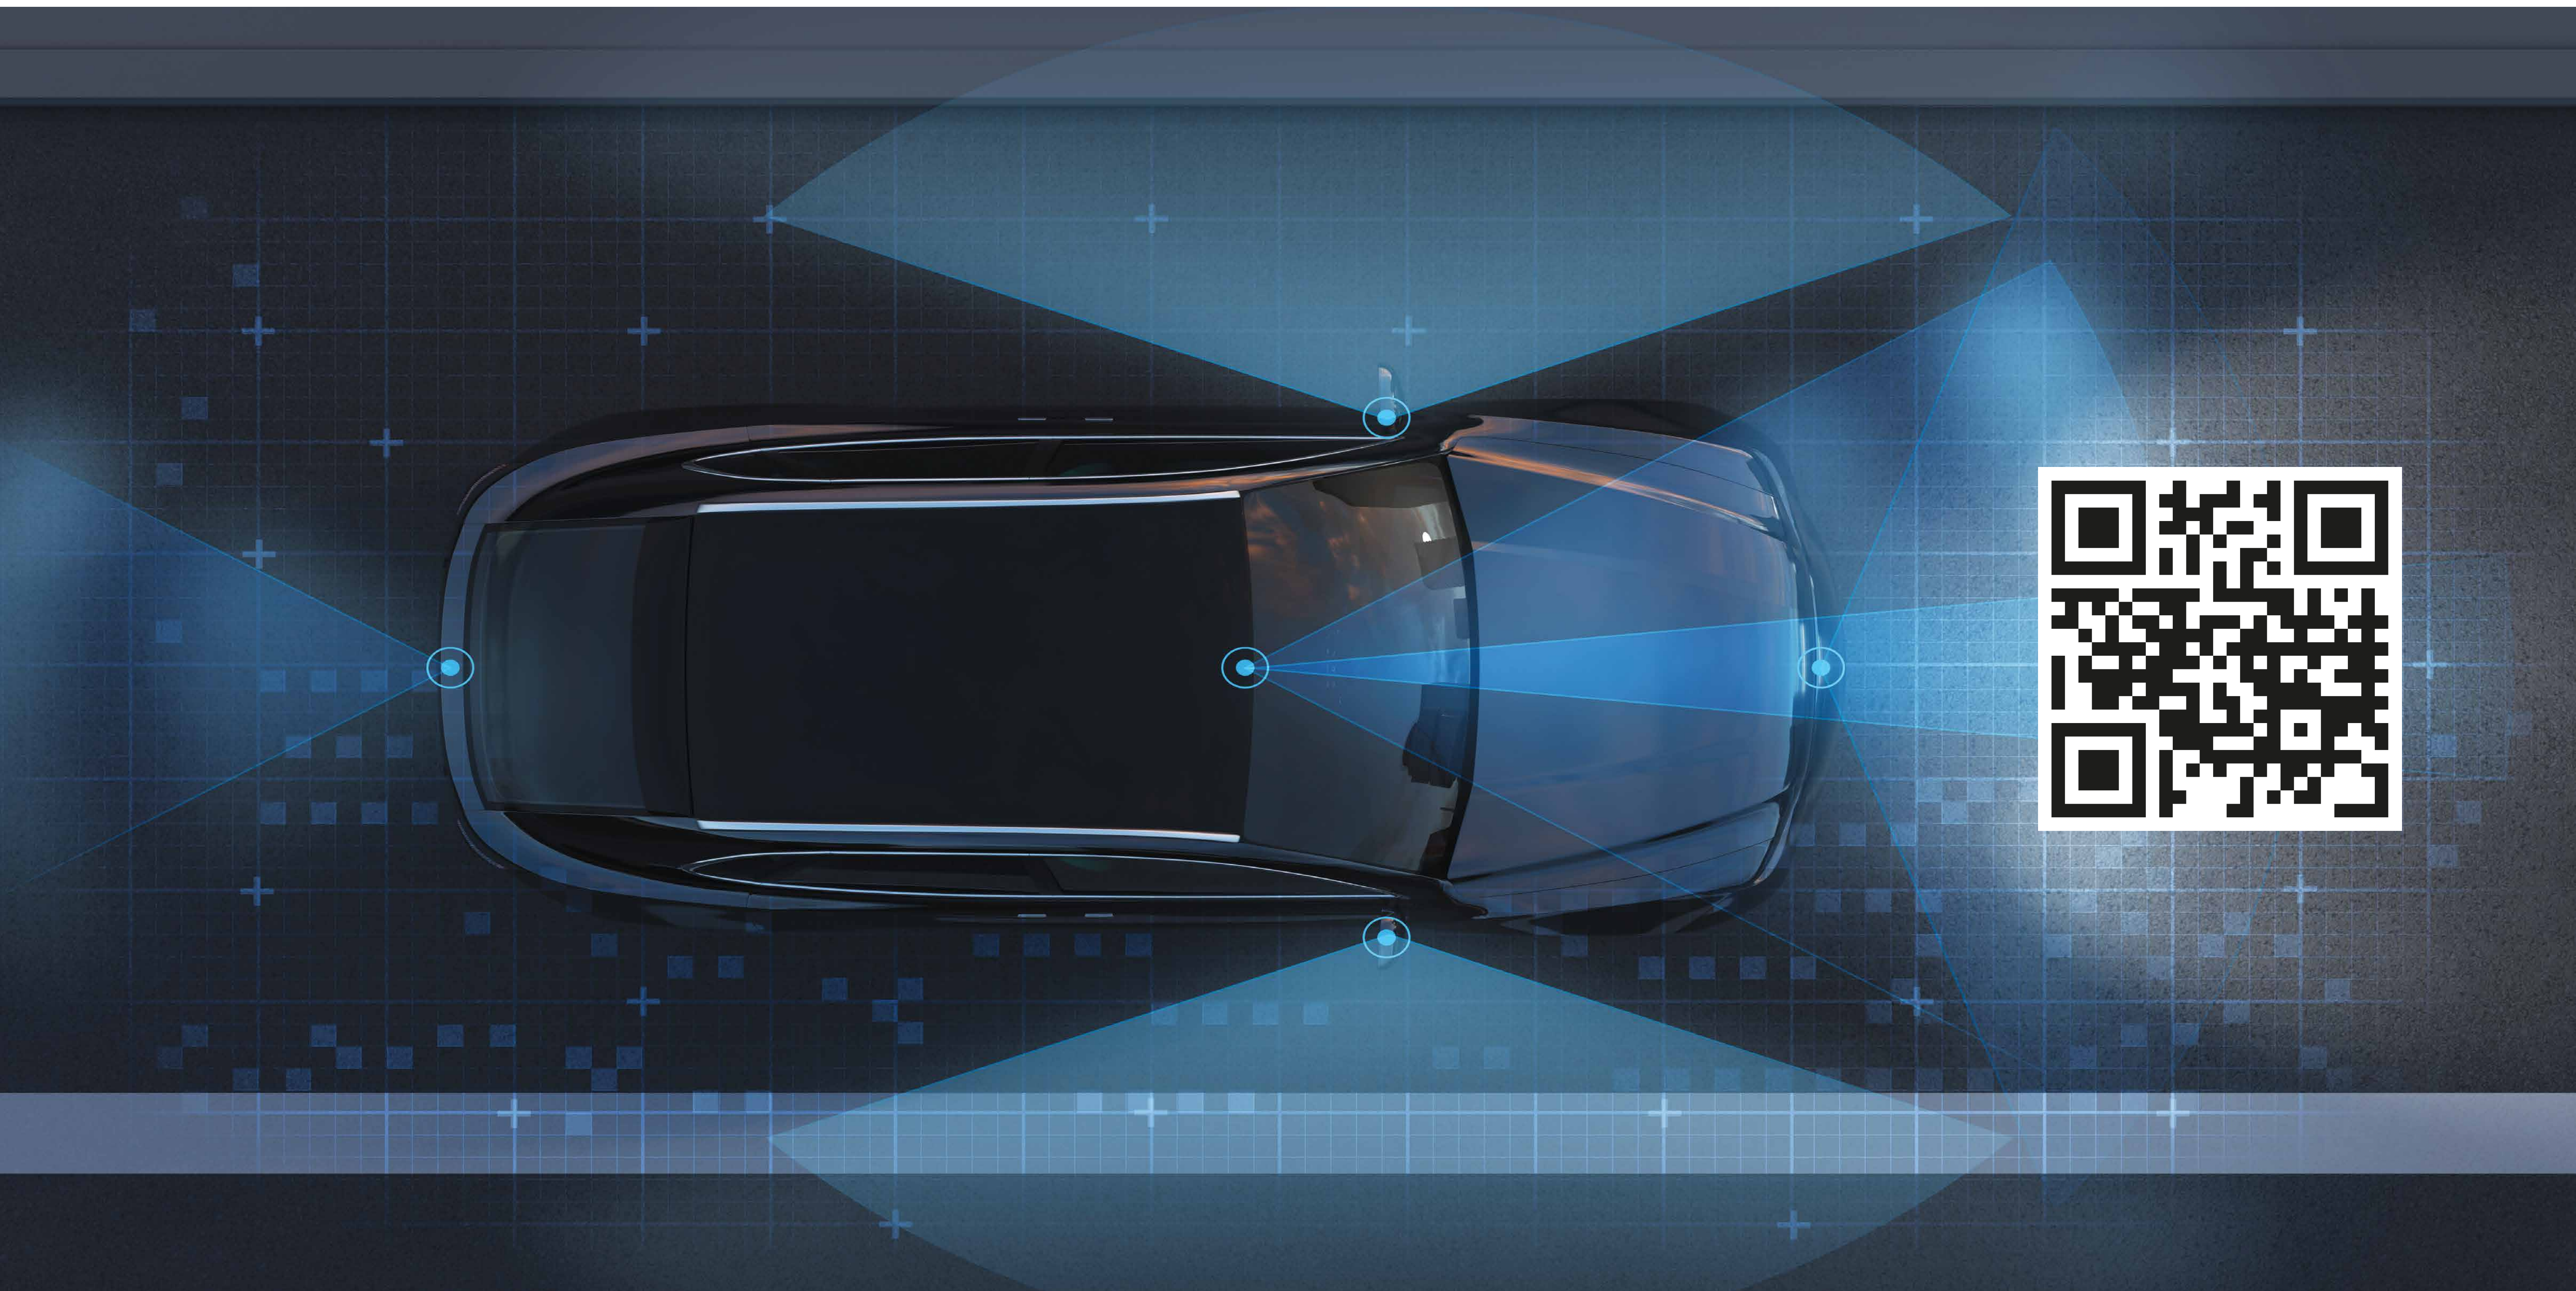

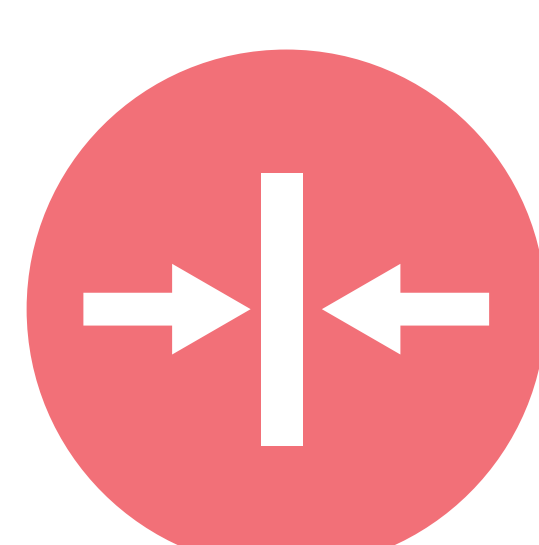

Harmonised European Solutions for Testing Automated Road Transport

1. IDENTIFY the existing methodologies, procedures & tools
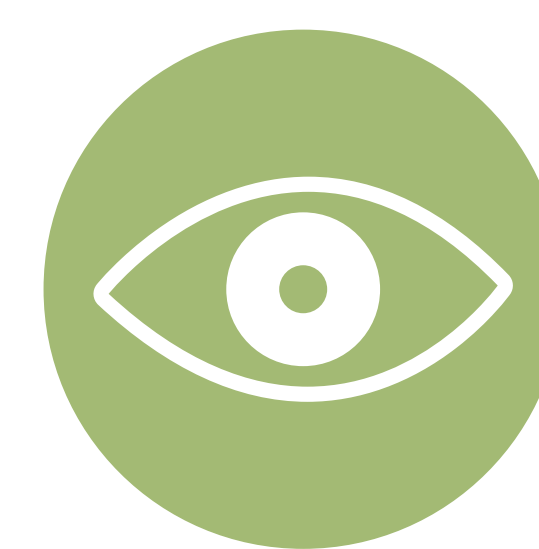

**2. HARMONISE** the existing testing and validation approaches

3. DEFINE & DEVELOP test, validation and certification methodologies and procedures for CAD functions

**4. DEMONSTRATE** the developed methodologies, procedures and tools through 4 use cases

5. REACH CONSENSUS by creating and managing an experts' network of CAD testing to promote adoption of the project results considering multi-stakeholder needs.
