[Newsletter #4, July 2021](#)

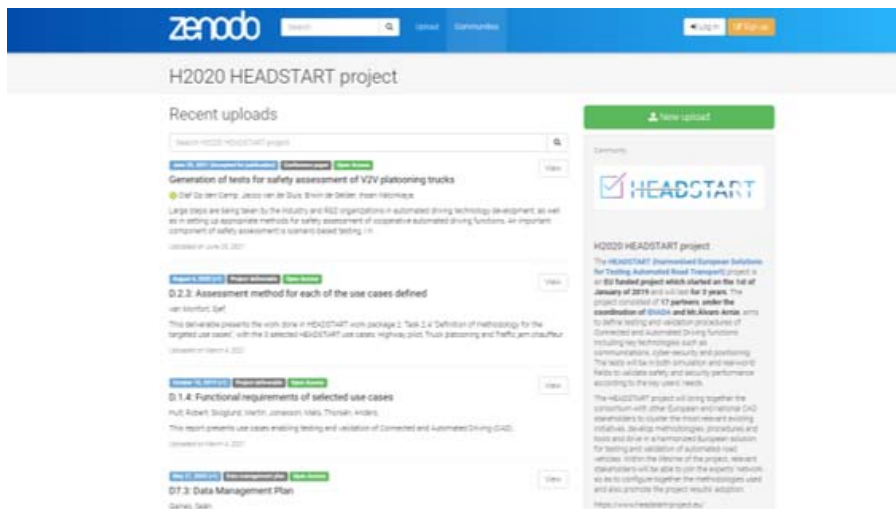

Dear reader,

*We are delighted to announce the release of the fourth **HEADSTART newsletter**. In this issue, we would like to navigate you into the HEADSTART Community in Zenodo where you can find the documents produced within the project. We encourage you to mark your calendar for the HEADSTART and FuSaCom Get2Gether Event on 13/09/2021 and also to take part in the EC Open Public Consultation on data sharing. Furthermore, we sum up the HEADSTART participation in EUCAD 2021. Moreover, four interesting blog posts provided by HEADSTART partners are included for you to read. Last but not least, we remind you to register in the upcoming ITS World Congress in Hamburg. [HEADSTART](#) will be one of the participants!*

If you wish to find out more and cannot wait up to the next newsletter, visit our [website](#), or join our social media. We wish you a happy, safe, and relaxing summer holiday!

The HEADSTART consortium

Visit the HEADSTART Community in Zenodo

Visit our [HEADSTART Community](#) in Zenodo and find out the Open Access documents produced within the project. **Zenodo** is a general-purpose [open-access repository](#) developed under the European [OpenAIRE](#) program and operated by [CERN](#).

**V2X Communication
within the HEADSTART
procedure,
blog post by Bern. Hillbrand**

**Scenario understanding
with ontologies,
blog post by Marcos Nieto**

The HEADSTART project aimed in a first step to develop a testing and validation procedure for Connected and Automated Driving (CAD) functions. In a second step the procedure itself need to be tested and validated to ensure that all necessary tasks and interfaces have been defined and the procedure can be executed from start to end.

Imagine two cars of the future, that just passed across in two-way road, and share some information.

– Hey Car A, this is Car B. Look! I've spotted a pedestrian at your right, not far from where you are heading, just between the two parked cars. Take care.

– Adult or children?

**UN Regulation 157,
blog post by Oriol Flix**

**Testing cybersecurity in a
CCAM ecosystem,
blog post by Athanasios Ballis**

Last January 2021 entered into force the first UN Regulation that covers a SAE level 3 system, or in other words, a system that can drive the vehicle under limited conditions without further confirmation of the driver.

[Read the full blog post](#)

Within the era of CCAM^[1] evolution we experience nowadays, cybersecurity is considered a crucial yet “intangible” characteristic. All related operations have to be secured enough, leading to acceptable safety levels.
